Mobile Browsing vs Desktop Browsing

Answer

Mobile browsing and desktop browsing are two different ways to use the internet. When you use a mobile device like a smartphone or tablet, you can browse websites on a smaller screen that you can carry around with you. It's convenient for checking emails on the go or quickly looking up information. On the other hand, desktop browsing involves using a computer with a bigger screen and a keyboard and mouse. This is better for tasks that need a lot of typing, like writing documents or doing complex research. Both ways have their advantages, so people choose the one that suits their needs best.
